## Infranomic Distribution

Thank you for expressing interest in becoming a distributor for Infranomic and entering the growing world of energy efficient infrared heating.

Our distributor requirements are very simple, basically it's up to you how you run your business; we do however have a few ground rules and a small monetary commitment which must be agreed in order for us to protect the business, products and other distributors.

Included with this letter is our distributor terms & conditions, these require signing and returning to us in order to receive our distributor pack – Please read carefully and return as soon as conveniently possible.

A monetary commitment of £550.00 excluding VAT is necessary in order to set your distributor chain and for you to receive our distributor pack. This commitment can easily be made back within a single sale and is necessary to cover all costs.

Your distributor pack includes the following,

- A demonstration 1100mm x 600mm Heating element – White or Black models only
- Full product knowledge and planning training
- Full Trade Pricelist
- Full Recommended Retail Pricelist
- Calculation Spreadsheet for Planning Heaters
- Advertising on our website

We also offer the following services available to you and your clients

- Credit Card Payment
- Finance Options
- Full Technical Support
- Assistance with Planning
- After sales support
- Attendance to meetings on a technical basis only (T&C Apply)

*We look forward to you becoming part of our team*

Yours sincerely

Paul Ortiz  
Managing Director  
Infranomic Energy Solutions Limited
